June Field Report

Nancy Grew, CanAssist Trustee, has just returned from Kenya, where she visited 10 project sites. Check out this newsletter for highlights of this great tour.

Visiting Projects in Western Kenya

CanAssist trustee and project manager, Nancy Grew, travelled to Kenya with her son, Adrian Grew in May. In addition to volunteering their time at two local schools, Nancy and Adrian visited the sites of 10 CanAssist projects. The opportunity to meet with associates and to oversee projects directly is one of the ways that we ensure that your donations are well used.

New water catchment at Kamin Oningo
We recently installed this tank.

New latrine at St. Catherine School Sanitation with support from Mr./ Mrs. Gruber, B.C.

Fuel Efficient Stove at Safe Haven Providing meals to vulnerable children on Rusinga Island.

"Together we are stronger" Adrian Grew takes historic photo of community basketball tournament on the new sports pad!

FROM RAMULA TO MBITA. CANASSIST IS IMPROVING THE LIVES OF HARD WORKING KENYANS

In Ramula, two schools have benefitted from CanAssist support. **Ramula Secondary** is still appreciative of the water catchment and kitchen projects that we completed. Adrian volunteered his time here, teaching Physical Education and Math. He also coached the newly formed basketball team. Sport is developing in this remote area. Nancy volunteered her time at **St. Catherine School**, where she taught Math and Social Studies. Students are loving the game of basketball and the new sports pad is used

daily. A new latrine is also making a positive impact and students also received books from Glenburnie School, a Kingston area school.

The water tanks at **Ojwaya** school are providing an essential and basic need and students at **Nyalunya Secondary** are looking forward to a new latrine. Plans for this upcoming construction project were made on this visit.

In the Homa Bay area, **S.P. Geddes School** continues to grow. A tour of the new Administration block revealed that teachers now have a space to work and plan lessons. The new water tank and generator at **Kamin Oningo** are also functioning well. Thanks to a new fuel efficient stove students are being fed at **Safe Haven** and the new bathing centre at **Kaswanga Girls' School** ensures that

girls can bathe in a secure setting. The furniture project at **Hope School** in Mbita is in its final stages and the garden project at **Kanyala Little Stars** will soon benefit from a new water tank.
